

# The 3<sup>rd</sup> ESA DUE GlobCurrent Project User Consultation Meeting, 21-23 March 2017, ESA-ESRIN, Frascati, Italy.

Measurements of Ocean Surface Currents (OSC) are essential to understanding of ocean circulation over a wide span of time and space scales. Accurate knowledge of the OSC distribution and variability at meso- and sub-mesoscale horizontal resolution is of growing importance to scientific, operational and commercial applications.

The meeting will present new GlobCurrent products, achievements and services in:

- Plenary presentations;
- Service demonstration
- GlobCurrent portal training;
- Case studies

Information on registration and abstract submission will be announced on the GlobCurrent Project (<http://www.globcurrent.org>) website shortly.
